

PFM CONTROLLED, STEP-UP DC/DC CONVERTERS (VARIABLE DUTY RATIO)

■ DESCRIPTION

The UTC **UC3383** Series are PFM step-up DC/DC switching converter. The UTC **UC3383** can support both large and small currents. It automatically switches duty ratio (45%/75%) when it senses changes in load.

Both built-in and external transistor types include 5-pin and 3-pin packages, which are provided with either a CE (chip enable) function that reduces power consumption during shut-down mode, or a V_{DD} pin function (separated power and voltage detect pins).

■ FEATURES

- * Output Voltage Range: 2.0V~7.0V in 0.1V Increments
- * Operating (Start-up) Voltage Range: 0.9V~10V
- * Highly Accurate: Set-up Voltage $\pm 2.5\%$
- * Maximum Oscillator Frequency (Max Fosc1): 180kHz ($\pm 15\%$)
- * Variable Duty Ratio: 45%/75% ($\pm 5\%$)
- * Both Switching Transistor Built-in and External Types are Available
- * 5-Lead Package Offer Chip Enable or Independent V_{OUT} Pin Option.
